Hazardous Weather

Day 1 Weather Hazards

Valid: 0800 Tue - 0800 Wed

Hazardous Weather

Day 2-3 Weather Hazards

Valid: 0800 Wed - 0800 Fri

Isolated areas of heavy rain and flash flooding possible over NM on Wednesday, especially over burn scar locations

A few strong to severe storms possible Wednesday

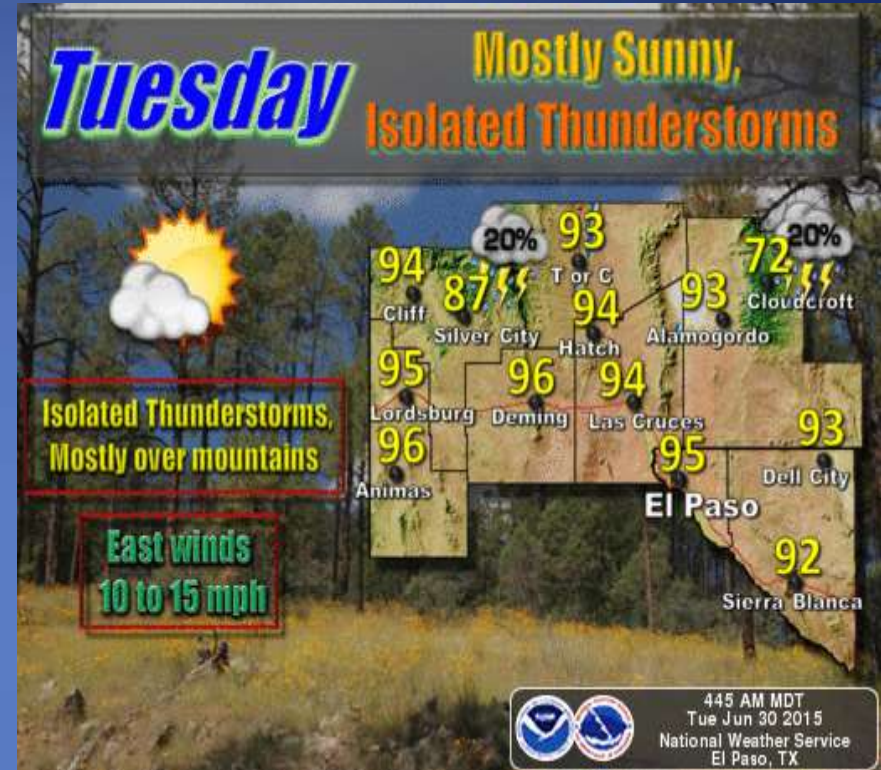

- Very Common – Happens Often
- Common – Happens Frequently
- Uncommon – A Few Times a Year
- Rare – Once Every 1-5 Years
- Very Rare – Once Every 5-10 Years

*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

Hazardous Weather

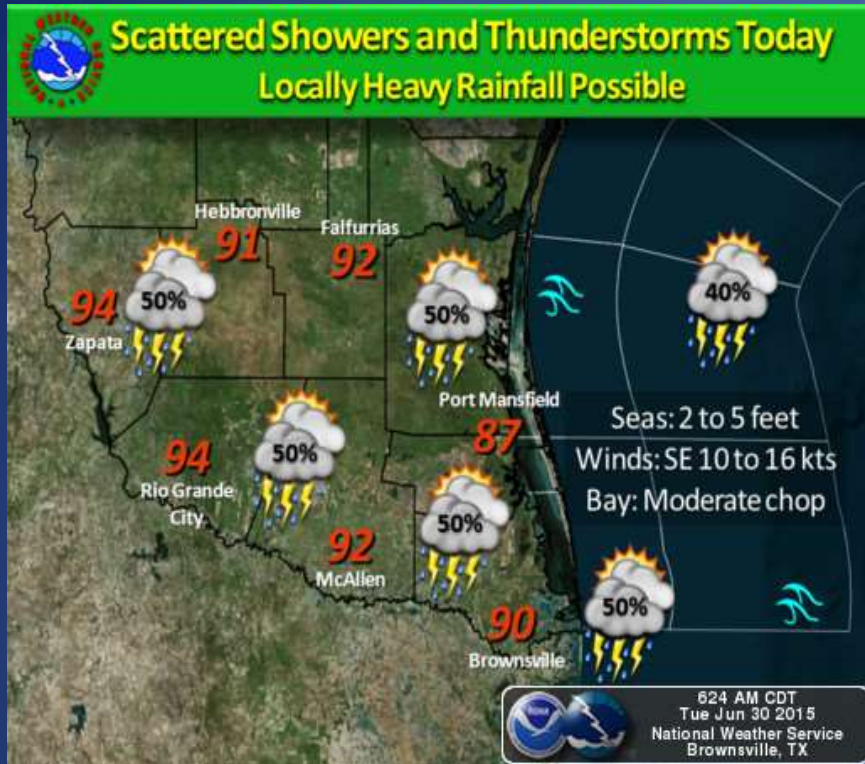

Isolated to scattered showers and thunderstorms are expected today. Locally heavy rains up to 2 inches in an hour are possible and may cause minor flooding. Strong wind gusts up to 40 mph are also possible. Temperatures will be 2 to 4 degrees below June 30th averages with highs in the upper 80s to lower 90s.

High pressure aloft over the Great Basin will persist throughout the day. Despite plenty of moisture in the lower atmosphere, thunderstorms will remain isolated and mostly over the mountains, as the high pressure aloft will suppress much of the convection. Temperatures will remain near hot late June normals...which are climatologically the hottest of the year.

Hazardous Weather

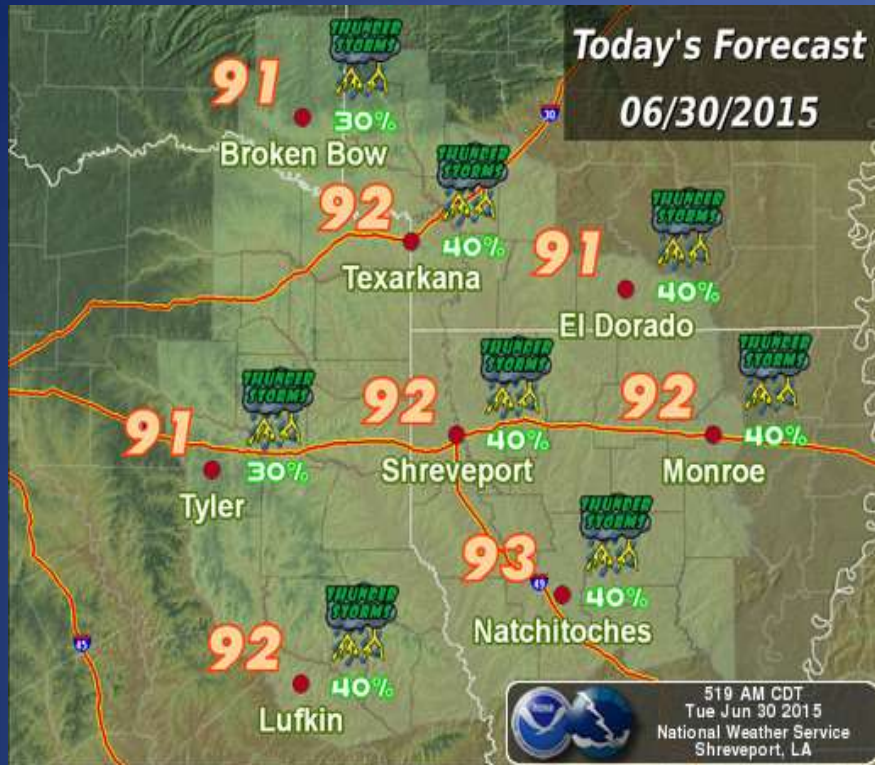

The surge of deep tropical moisture, weakness overhead, and daytime heating will lead to scattered showers and thunderstorms today across the area, with the greatest activity spreading west this afternoon. Locally heavy rainfall is possible today, which may produce minor flooding across portions of the Rio Grande Valley and the northern ranchlands, especially across areas with poor drainage. Cloud cover and shower and thunderstorm activity will keep high temperatures below normal today, with highs only in the mid to upper 80s along the coast and in the lower to mid 90s inland.

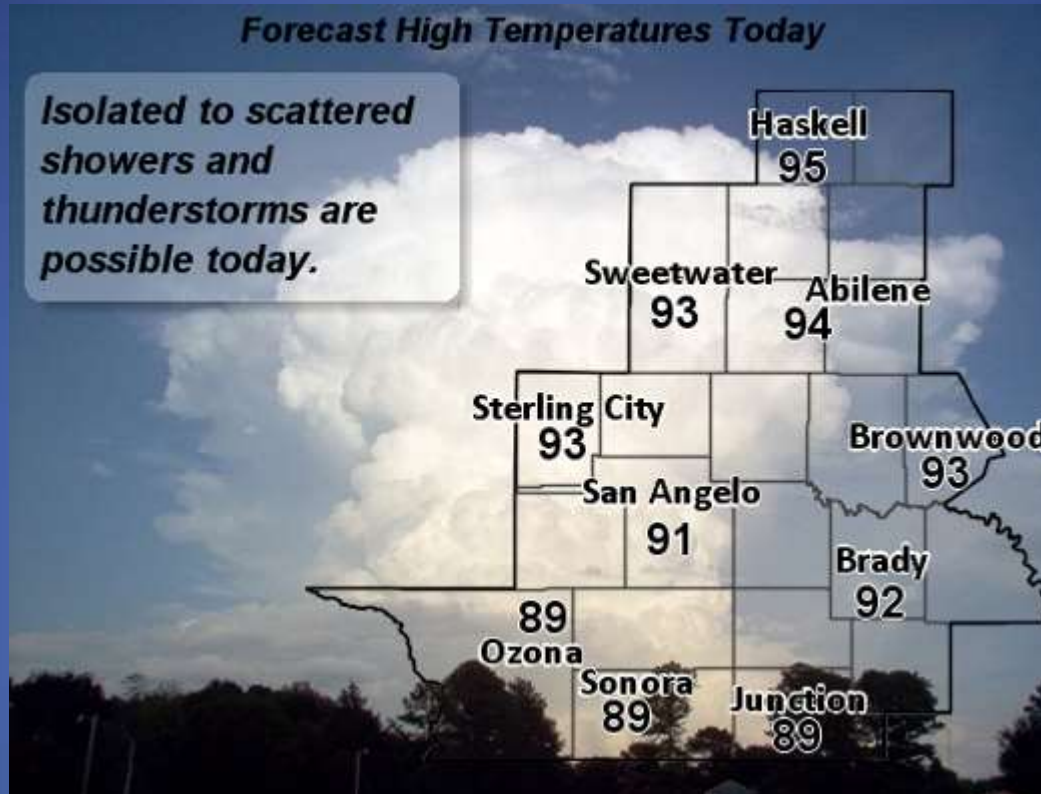

Wetter conditions are expected for today. Scattered to numerous showers and thunderstorms (about a 50% to 60% chance) are forecast to develop through the day. Locally heavy rainfall may also occur which may lead to minor flooding. The greatest chances and best coverage is currently expected to be across the Brush Country this afternoon.

Hazardous Weather

Isolated to scattered, showers and thunderstorms will occur again today. Higher chances will occur across the southeast counties. A few storms may reach strong, or briefly severe limits with very gusty downburst winds, pea hail, frequent lightning, and heavy rainfall. Highs will range from around 90 south to the mid 90s northwest. Afternoon heat may reach to between 100 to 102 degrees across areas east of I-35 due to higher humidity values.

Hazardous Weather

Very warm and humid conditions will continue today, with isolated to scattered showers and thunderstorms possible. Severe weather is not anticipated.

Weather Warning/Advisories Issued

| DATE | WARNING TYPE | LOCATION |
|----------|---------------------------------------|---|
| 06/29/15 | Flood Advisory | Armstrong, Bosque, Donley and Hamilton Counties |
| 06/29/15 | Urban and Small Stream Flood Advisory | McCulloch and San Saba Counties |
